

ENERGY STAR® L18 Families

KICHLER UPDATES ENERGY STAR OPTIONS WITH A NEW LED BULB

Kichler has selected a new Energy Star rated LED bulb as part of our continued commitment to offering energy efficient products. With this program, Kichler includes LED bulbs with select lighting families as an alternative to the primary SKU. Our new LED bulb is 3000K, offers 92 CRI and 800 lumens, is dimmable and uses 10 watts. Item numbers include an L18 suffix to represent the light bulb addition.

The benefits of this program include:

- **Energy efficiency.** The L18 options are ENERGY STAR certified and deliver highly efficient LED operation, an added value for homeowners. This group of products is also registered on the ENERGY STAR website, www.energystar.gov.
- **Added convenience.** Simply place one order for the light fixture and bulbs.

The L18 fixture assortment replaces the L16 program. What does this mean? Effective August, 2018, for the lighting families listed below and contained within Kichler catalogs published in 2018, item numbers with the L16 suffix will be replaced as inventory is depleted with item numbers ending in L18. For example, Joelson 43922NIL16 will now be ordered as 43922NIL18.

The L18 assortment is available with the following families:
