Intertek

CASCADING LED TUBE LIGHT

Designed to look like falling snow and mimic the look of shooting stars, Starfall tubes enhance the visual impact of your seasonal installation with virtually unbreakable, energy efficient LED tubes and saves time with a convenient installation process. Simply screw Starfall tubes into existing C9 (E17) light stringers and suspend from tree branches, along roof lines and across the deck in various lengths for a dazzling display of animated light.

FEATURES

• Simulates falling snow for enhanced visual experience
• Easy installation - simply screws into E17 socket stringers
• Durable polycarbonate lens is virtually unbreakable
• Two sizes available - 24" and 36" lengths
• Available in Pure White and Warm White color options
• 120V AC Operation - 1W per bulb - 15,000 hour rating
• cETLus Listed for indoor and outdoor use

COMMERCIAL 5MM

Commercial Coaxial LED Light String

This lens is 5MM tall with an inverted cone at the top of the lens that disperses the very directional light from the LEDs to more closely approximate the sparkle of incandescent mini lights. Our most popular lens type is offered in 8 different colors and features commercial coaxial connections for all season use.

FEATURES

- Up to 90% energy savings over incandescent light string
- Connect up to 125 light strings to a single power source
- Coaxial power connection system provides strain relief and keeps moisture out of connections
- Durable construction includes thicker 20AWG wire
- Available in 6 different color options
- Connection accessories available for large scale installations while minimizing connections to power
- CSAus Certified for indoor and outdoor use
- 3-season warranty

COMMERCIAL G12

Commercial Coaxial LED Light String

The G12 is a spherical, 12mm in diameter faceted lens that creates a look similar to berries or small orbs where it's installed. Enjoy longer runs of light and easier installation using commercial LEDs, with water tight co-axial connectors to reduce maintenance time during the busy holiday season.

FEATURES

- Up to 90% energy savings over incandescent light string
- Connect up to 125 light strings to a single power source
- Coaxial power connection system provides strain relief and keeps moisture out of connections
- Durable construction includes thicker 20AWG wire
- Available in 6 different color options

TWINKLE 5MM ⓤ LISTED

Commercial Standard LED Light String

The Standard 5mm Twinkle light string creates an eye-catching display with a slow, random twinkling effect. LEDs in the string turn on and off randomly drawing attention and adding additional sparkle to displays. Use exclusively for an overall effect or inter-mixed with 5mm Standard strings for a subtler display that still has movement.

FEATURES

- Twinkle on and off lighting effect
- Up to 90% energy savings over conventional incandescent light string
- Standard plug and socket power connection
- Inter-connectable up to 210W
- 60,000 (PW/UWW)/100,000 (color) hours rated life
- Pre-assembled, durable plastic sockets with fused stacked plug
- UL Listed for indoor and outdoor use
- 1 Year Warranty

OMNI-CLIP	Omni Shingle/Gutter Clip	500

MAGNETIC C7/C9 CLIP

- Magnetic surface mounting clip for C7 or C9 stringers
- Magnetic base secures to most metal surfaces for fast installations
- Twist lock design securely holds bulbs
- Made with high quality resin and UV stabilizers

ITEM NUMBER	DESCRIPTION	QTY
MAGCLIPC9	C7/C9 Magnetic Surface Mount Clip	100

U-CLIP

- 2" U-shaped C7 and C9 mounting accessory for deck railings
- Simply slide onto railings to hold stringers in place
- Features utility hook for hanging icicle lights or garland
- Made with high quality resin and UV stabilizers

ITEM NUMBER	DESCRIPTION	QTY
U-CLIP-PREM	C7/C9 Stringer Railing Mount U-Clip	500

C-CLIP

- Hard plastic clip used to mount C7 and C9 stringers to roof-lines, under eaves, or where other clips traditional clips cannot be used
- Mount with screws or silicone adhesive for permanent installations
- Made with high quality resin and UV stabilizers

ITEM NUMBER	DESCRIPTION	QTY
39006	C7/C9 Stringer Surface Mount C-Clip	500

LAWN STAKE

- Mounting accessory for lining sidewalks and driveways
- Available in 5" and 10" stake length options
- Speed ratchet head saves time by seating C7 or C9 sockets and twisting into place
- Glass-filled nylon for a rigid, durable design

ITEM NUMBER	DESCRIPTION	QTY
39021-PREM	5" Lawn Stake	500
39022-PREM	10" Lawn Stake	500

ICICLE LIGHT CLIP

- Exclusively used to attach icicle lights to roof-lines and gutters
- Slides under shingles or clamps to a gutter via utility hook
- Recommend using one clip per icicle drop for best display results
- Made with high quality resin and UV stabilizers

ITEM NUMBER	DESCRIPTION	QTY
39303	Icicle Light Mounting Clip	100

MINI LIGHT CLIP

- Attaches mini lights to windows or other solid surfaces
- Two size diameters accommodate incandescent or LED mini lights
- 3M adhesive backing for surface mounting
- Made with high quality resin and UV stabilizers

ITEM NUMBER	DESCRIPTION	QTY
39095-PREM	Mini Light Surface Mounting Clip	1000

CATENARY CABLE

## Multi-purpose Suspension Cable

Multi-purpose suspension cable with cable locks for quick, reliable support up to 330 pounds of load and spans up to 110 feet. Available in short run kits that include standard cable locks for each end, or in 500ft bulk reels that include four heavy duty locks.

FEATURES

- Provides support for spans of Commercial Grade Light String, C7 & C9 Stringers, and other linear products
- 1/8" diameter outdoor rated, galvanized cable and clips resist corrosion
- Cable fasteners can be attached without the use of tools and can be adjusted quickly and easily
- Tensioning Tool allows you to tension wire up to 880lbs with minimal effort due to the 6:1 gear drive mechanism
- The integral torque gauge controls the load applied to the wire, giving consistent tension every time and optimizing the life of the wire

STARFALL LIGHT

LED Cascading Tube Light

Starfall tubes are designed to look like falling snow and mimic the look of shooting stars. Enhance the visual impact of your seasonal installation with virtually unbreakable, energy efficient LED tubes and save money and time in a convenient installation process. Simply screw Starfall tubes into existing C9 (E17) light stringers and suspend from tree branches, along roof lines and across the deck in various lengths for a dazzling display of animated light.

FEATURES

- Simulates falling snow for enhanced visual experience
- Easy installation - simply screws into E17 socket stringers
- Two sizes available - 24" and 36" lengths
- Durable polycarbonate lens is virtually unbreakable
- Dual sided illumination for increased visibility
- Available in Pure White and Warm White color options
- Prefect for C9 stringers and commercial grade light string
- 120V AC Operation - 1W per bulb - 15,000 hour rating
- cETLus Listed for indoor and outdoor use

LED Rope Light Bulk Reels

Professionally crafted LED Flexbrite offers design flexibility and commercial grade quality, weather resistant construction that can stand the test of time. Clear UV inhibited PVC tubing allows for the highest brightness to shine through to increase linear lighting effects, resulting in vibrant rope light displays great for residential and commercial lighting applications.

FEATURES

- Available in 150ft bulk reels and custom cut options
- Clear, UV inhibited PVC housing
- Parallel wiring to each LED ensures that if one LED goes out, the rest of the cutting increment stays lit
- Vertically mounted 3mm LEDs at 1" spacing
- *Cuttable every 36" and 60" (see individual ordering info)
- Perfect for outlining landscapes and signage
- UL Listed for indoor and outdoor use
  (*UL Listing void if cut)

LED LIGHTSTAR

Bulk Reels

A great low voltage option for your year round lighting displays, LED Lightstar provides a warm white linear lighting option that saves 75% in running costs over incandescent while significantly reducing maintenance costs. Use for tree, festival and tent, accent, decorative, architectural detail, patio, deck, and gazebo lighting.

FEATURES

- 5mm inverted cone lenses attached to 18AWG SPT-2 wire with LEDs spaced every 5.9"
- Wide viewing angle (180°) for high visibility
- Low-voltage reels are safe for year-round use
- 12V DC operation requires a 12V power supply
- 200ft Maximum run lengths
- Long life LEDs last up to 50,000 hours
- Suitable for year-round outdoor use (IP65)

Shown for visual reference only - LED spacing may not depict actual product

Linear Wall Washers

RGB Array Wall Washer

AMERICAN LIGHTING

LINEAR WASHERS

3000K & RGB LED Wall Washers

High power LEDs combined with a durable aluminum housing rated for wet locations make this family of lighting tools perfect for high impact illumination, indoors or out. Available in a warm white single color version as well as an ultra dynamic RGB option, add either to your commercial lighting installations for the ultimate wow factor.

FEATURES

- High impact dynamic linear LED wall washer
- Available in 3000K warm white and dynamic RGB
- RGB wall washer features built-in standalone mode
- Multiple fixture lengths available (warm white)
- Durable aluminum alloy housing with enamel finish and tempered glass lens rated for wet locations
- LED light source saves energy and reduces maintenance
- Built-in driver and 5ft grounded power cord
- Integrated mounting holes in base/leg brackets with adjustable tilt design for installation flexibility
- Suitable for indoor and outdoor use (IP65)

LED Linear RGB & LED RGB Array Wall Washer	1 Year	60,000

*AVERAGE LIFE

Average incandescent lamp life, rated life and average life are terms used to describe the number of hours at which half of the lamps have failed. For LEDs, the hours of rated life specify the point where 70% of original lumen output is reached. Below this point, the effective life is over, however, the LED may still emit light. Individual results may vary with actual environmental conditions including, but not limited to, proper installation, ambient temperature and/or input voltage fluctuations.

**Commercial Coaxial LED light strings have a three season warranty, where each season is limited to 90 days; If commercial coaxial LED light strings are left up year round, warranty consists of 1 year.

†Standard Linear Warranty applies. See next page for details.

†† Limited Product Warranty applies to lengths up to 75 feet. See next page for details.

LIMITED PRODUCT WARRANTY

American Lighting products are warranted to be free from defects in material and workmanship for the warranty period listed on the previous page by category. Warranty periods begin from the date of shipment from American Lighting Inc's warehouse to the original purchaser. Products that prove to be defective during their specific warranty period will be either repaired or replaced, at the sole discretion of American Lighting Inc. Claims for defective products must be submitted in writing to American Lighting Inc's RGA Department within the warranty period. Upon approval of such return, American Lighting Inc reserves the right to inspect the product for misuse or abuse. Claims for indirect or consequential damages or for product that, in American Lighting Inc's opinion, has been misused will be denied.

This is a warranty of product reliability only and not a warranty of merchantability or fitness for a particular purpose. American Lighting Inc shall have no liability whatsoever in any event for payment of incidental or consequential damages, including, without limitations, installation costs and/or damages for personal injury and/or property. These products may represent a possible shock or fire hazard if improperly installed or altered in any way. This warranty does not apply to any product that has not been properly installed in accordance with current local codes and/or the National Electrical Code. Products that require a transformer, driver or power supply must be used in conjunction with American Lighting Inc's recommended power supply to ensure safety and retain product warranty.

Warranty Information Continued

STANDARD LINEAR WARRANTY

Rope light and linear lighting products in all their various types and shapes, whether LED or incandescent, are wired in series parallel. This means that several individual lamps or LEDs are wired together in series to equal 12V, 24V or 120V. Then these sections are wired together (in parallel) to light up in unison. If one solder joint, lamp or resistor fails, a whole section will not light. Due to the number of elements involved, and the numerous extenuating circumstances beyond our control, American Lighting Inc offers a Standard Linear Warranty on most linear lighting products. The limited liability warranty is listed above, however the Standard Linear Warranty offers replacement product by section due to defective material and/or workmanship for one year beginning from the date of shipment from American Lighting Inc's warehouse to the original purchaser.

LED technology is changing rapidly, and not all color temperatures and performance levels can be duplicated at a later time. Best practices include purchasing 10-15% more for a particular project on the same initial order where white LED color temperatures must be maintained over project and product life. Eventual product replacement should be considered at layout and design stages. Best practices also include testing connections and product performance prior to mounting and/or installing.

USE OF LINEAR LIGHTING IN OUTDOOR APPLICATIONS

Incandescent rope light and LED Flexbrite UL 2388 custom cuts; incandescent and LED Flexbrite pre-packaged kits; and UL Listed (special order) cuts of LED Neon Flexbrite Plus and Economy have factory assembled power connections and end caps that seal the rope from moisture. Due to strict quality control standards, American Lighting is able to offer a limited warranty on these items rather that the standard linear lighting warranty that replaces product by defective section only. For outdoor applications, best practices include using kits interconnected (same length kits are best for color control of White LED Flexbrite) or using custom cuts that do not exceed 75 feet.

For all linear lighting categories, any non-rated field connection made in an outdoor application should be properly sealed with dielectric grease covering all conductive materials; and properly installed power connections and end caps, sealed with silicone and heat shrink tube. However, since non-rated (field executed) power connections of linear lighting products cannot be quality controlled, and outdoor use of non-rated product is not recommended, American Lighting cannot warrant the product to any purchaser.

PRODUCT SPECIFICATIONS

For the latest product information, updates, instructions and details concerning specifications, colors, finishes, performance, installation and design, visit www.AmericanLighting.com. Color may vary from the color printed herein due to limitations in photographic and printing processes. American Lighting Inc. reserves the right to change product specifications without notice. Other product specifications such as color temperature, wavelength characteristics and lumen output are subject to production limitations and may vary.

LED technology is changing rapidly, and not all color temperatures and performance levels can be duplicated at a later time. Best practices include purchasing 10-15% more for a particular project on the same initial order where white LED color temperatures must be maintained over project and product life. Eventual product replacement should be considered at layout and design stages. Best practices also include testing connections and product performance prior to mounting and/or installing.

GENERAL TERMS AND CONDITIONS

GENERAL TERMS AND CONDITIONS

To Our Valued Customer,
American Lighting is committed to providing you with the highest quality Residential, Commercial, and Seasonal lighting products along with unsurpassed Customer Service.
Please refer to the information below with regards to initial orders, shipping, freight, merchandise returns, cancellations and safety.

MERCHANDISE RETURN POLICY

The retention of goods by the Buyer or for the benefit of the Buyer without written objection within five (5) business days after delivery shall constitute an unconditional and absolute acceptance by the Buyer. Errors in billing and shipping must be reported in writing to the American Lighting, Inc RGA Department within five (5) business days from receipt of the shipment. FAX 303-695-7633.

All returns require a pre-authorized RGA number. Returns received without prior authorization will not be accepted by American Lighting, Inc. Receiving an RGA number does not imply acceptance and/or payment of credit; it is only permission to return material to American Lighting for evaluation. For proper credit, all returns must include the authorization number (clearly marked on the outside of each box) and a copy of the original invoice or packing slip. All credits must be used within 120 days, or they will expire and no longer be valid for use. The Buyer will incur a re-stocking fee based on the TABLE below and will be responsible for all freight charges for product returned due to over-stock and/or Buyer ordering error. Refused or undeliverable shipments will be subject to a 20% re-stocking fee in addition to all applicable shipping costs.

Return Timeframe	Re-Stock Fee
0-180 Days	20%
181-365 Days	35%
365+ Days	Contact American Lighting

Sales of 'seasonal products' are final. Defective seasonal product may be returned for replacement only within our normal warranty period. Sales of any 'Limited Quantities Available' product are final. Sales of "Custom Cut" and "By the Foot" linear lighting products are considered "special order" and all sales are final. Defective linear product may be returned for replacement only within our normal warranty period.

Please visit www.americanlighting.com to download the RGA Form.

PAYMENT TERMS AND CONDITIONS

American Lighting, Inc accepts the following credit cards:
VISA, MasterCard, Discover, and American Express.

Buyers wishing to establish a line of credit must submit a completed and signed American Lighting, Inc Credit Application and a copy of their Resale Certificate prior to placing their initial order. A $1000 minimum opening order is required for any new account. A credit application may be downloaded from our website at www.americanlighting.com. Completed applications should be faxed to the Credit Department at 303-695-7633. American Lighting, Inc reserves the right to deny or revoke credit or extension of credit to any Buyer at its sole discretion without recourse from the Buyer and without prior notice to the Buyer.

Approved credit terms are Net 30 Days. Finance charges in the amount of 1.75% per month (21.0% APR) will be applied to all invoices with a past due balance. Returned (NSF) checks are the responsibility of the Buyer and are subject to a 10% surcharge on the entire order. Pre-payment terms may be established on a case by case basis.

WILL CALL

Will call orders are subject to a $3.00 handling fee.

PRICES AND PRODUCT SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE.

ORDER CANCELLATION POLICY

American Lighting Inc. will not accept cancellation requests for custom orders, special orders or direct from manufacturer shipped orders. Order cancellations for stocked products must be submitted in the form of a written request to the American Lighting Inc. Customer Service Department prior to 2:00PM MST on the same day the original order was faxed or emailed. Fax to 303-695-7633 or email to orders@americanlighting.com.

The Buyer will be charged a 20% re-stocking fee and all applicable shipping charges on any order refused or returned without an authorized cancellation number.

FREIGHT

F.O.B. Denver, Colorado.
American Lighting, Inc ships all orders using our preferred carrier. Shipping an order on the customer's own freight account is not allowed unless it is pre-approved by the Customer Service Manager AND when the carrier matches American Lighting's preferred carrier. Pre-approved "Freight Allowed" orders will be shipped via Ground Delivery. Call factory for pre-approval and freight allowed amount.

Products of a seasonal nature do not qualify for "Freight Allowed" shipping.

SHIPMENTS

Delivery is contingent upon strikes, fires, accidents, delays of carrier, or other delays beyond our control. We strive to ship available product the same day when orders are faxed and received by our Customer Service Department by 2:00pm MST, Monday - Friday. FAX 303-695-7633.

DROP SHIPMENTS

We are happy to process drop shipments for our customers. Each drop shipment will be subject to $5 (USD) Drop Ship fee in addition to the normal freight charges associated with the order. For drop shipment orders, American Lighting recommends that all orders be designation "Signature Required." At the customer's request, we will ship the order with "Signature Required." American Lighting will not be responsible for lost or stolen product from a job-site or delivery-site.

SMALL ORDER CHARGE

All orders under $50.00 will be subject to a $10 Small Order Charge.

FREIGHT CLAIMS/PACKAGING

American Lighting, Inc's products are carefully inspected prior to packaging and are packed properly for shipment. We cannot assume responsibility for damage occurred in transit. If you do not inspect the cartons upon arrival for possible concealed damage, you risk forfeiture of a freight claim. All freight claims for damages or breakage, whether obvious or concealed, must be submitted in writing to the American Lighting, Inc RGA Department within 48 hours of receipt. FAX 303-695-7633.

Note: LED technology is changing rapidly. LEDs are made in lots and sorted into bins based on wavelength ranges that achieve colors. Products ordered at different times may not have the same color appearance due to variations of up to 10% within lots.

SAFETY

You must disconnect lighting products from the power supply before servicing or replacing bulbs. Only qualified personnel should install and perform service on lighting products. Periodic inspection and maintenance is required to keep equipment operating properly and at peak performance. Do not mount fixtures on or adjacent to combustible materials.
