

LIGHTING  
IDEAS

JANUARY 2021

KICHLER®

## Inspiring Design with Light

Inside our latest Lighting Ideas Guide, we'll take a look at how retro and industrial styles are leading the way in style and décor. How lighting and design enhancements can easily switch up a room's look, just with simple changes. Learn design tips and ideas from our in-house design team and Kichler influencers. Explore how to update the most popular spaces in the home and transform the tiniest spaces into favorite retreat spots.

## CONTRIBUTORS

Meet our product design team and influencers working to light and inspire your home.

### Kichler Lighting Product Design Team

Meet our Kichler Design Team that take visions and transform them into design inspirations.

With decades of combined experience in lighting, interiors, fashion, and consumer goods, our product design team find their inspiration from traveling the world, gaining insight into a variety of styles and trends. These experiences and inspirations come to life and transform into beautiful lighting collections.

### Home Decor and Lighting Influencers

Meet a few of our influencers that help bring our visions to life inside their homes. Find them on Instagram at their handles below.

**@athomewithashley**

Interior Designer that shares a mix of larger renovations, fun DIY projects, decorating and styling advice with a vintage and eclectic flair, whether you're splurging or on a budget.

**@jessicasaramorris**

Interior Designer and DIY enthusiast that started WhitePicketFarmhouse.com, which quickly became popular on Pinterest and DIY websites.

**@thegoldhive**

DIYer fixing up a historic bungalow in San Diego, CA, sharing home improvement and renovation stories, plus tips for sustainable living.

**@mojisstyle**

After starting a YouTube channel and working full time in intellectual property law, this mom of 3 started on her home decorating journey, which encompasses a glam and luxe approach to style.

Look for our designer quotes throughout this guide."

## RETRO LIVING

### A unique spin on past design styles.

When it comes to the décor of your home, this throwback style is a trend that stands the test of time. A far cry from the 'far out' looks you may think of as retro, retro living encompasses many styles, ranging from the 1920s all the way to the '70s. But there are common features that run throughout this statement style that make it truly timeless such as patterns, shapes, and pops of color. To truly appreciate retro living you need to understand the styles that are responsible for its inspiration - art deco and mid-century modern.

## RETRO LIVING

Retro living is defined by bright pops of color; pinks, blues and oranges set against high-gloss black lacquer furniture to make a space more retro. Gone are the dark wood furniture and basic colors of traditional décor, replaced with fresh, bright colors and black, white or gold finishes. Lighting with brass finishes, matte black, or a flash of polished nickel help add a pop to this slick style statement.

RETRO STYLE

## Luxurious Modern

Born out of a strong desire to shed the past and embrace all things futuristic and modern, the art deco movement is glamorous at its core. Decorative, decadent and detailed, its décor is defined by patterns and oversized geometric shapes which can be seen in wallpaper patterns, artwork, rugs and pillows. Play up metallic and black finishes and pair them with luxurious textures for a perfectly curated art deco style.

## Glitter and Glam— that's Art Deco.

Polished nickel, bronze, brass and gold, matte or super shiny. It's a decorative mix that can surprisingly inspire richer paint colors, furnishings and perhaps even a foyer chandelier in a bedroom. It's luxurious to the eye and to the touch. A lush throw in jewel-toned velvet or a sparkling mantelpiece that shines with metallic brilliance will bring a luxe art deco feel into any space.

A

Classic Pewter

## Simple and Sleek

There's nothing complicated about mid-century modern. From clean and straight to delicately curved, lines are simple and stunning. Think tulip dining chairs, hairpin coffee tables and cool bath lighting.

#### DESIGN TIP

Pick furniture with clean lines in metal, leather or wood. When it comes to color, think neutrals with cream, gray, brown, tan and black.

## INDUSTRIAL LIVING

### Urban flare with refined touches.

Loved by urban dwellers, embraced by suburban neighborhoods, and right at home in a country farmhouse, anyone (anywhere) can achieve this warehouse-inspired style. Taking cues from old factories and 20th-century buildings, industrial style combines utilitarian-inspired design with worn textures and simple nods to nature.

A

## Industrial with a Mid-Century Twist

Looking for a mid-century spin on industrial style? Look for furniture inspired by the industrial boom of the 1950s. Leather or vinyl accents are a great start, and of course, tapered or hairpin legs add an instant dose of nostalgia. Weave in soft, vintage touches like a loved, weathered leather chair, metalwork patterns, and a soft, muted paint color – for a look that is a little industrial and a little mid-century.

## INDUSTRIAL LIVING

Industrial isn't all rugged and warehouse-style. It's exposed metals, leathers, and weathered woods with textured, decorative pillows and throws, round-edge furniture, and polished accent frames. It mingles industrial ruggedness with soft, smooth edges. Want to add a more vintage feel to your industrial look? Incorporate worn metal drawers, exposed fittings, and reclaimed wood furniture pieces.

[Kichler.com/Industrial](https://www.kichler.com/Industrial)

“

Eastmont™ is sophisticated and luxurious. Its finely reeded socket covers and rich walnut finish epitomizes the rustic-meets-refined aesthetic.”

**Richard Stone, Associate Product Designer**

## STYLE IDEAS REFINED

## What is Refined Industrial?

Refined Industrial incorporates thinner, more delicate metalwork with refined details and mixed finishes. To create this look, start by adding pieces such as glass, gold, and wood blends for a clean, refined look. Incorporate neutral paint colors and lighting fixtures that feature woods, mixed finishes, and textures.

**A.**

## Vintage Industrial

Add a vintage spin on an already throwback style with vintage industrial. This rugged and unfinished look is inspired by the early machine era during the Industrial Revolution. Want to add a little vintage to your industrial style? Add in painted metals, concrete floors, metal lighting shades, and exposed fittings to make this vintage style shine.

#### DESIGN TIP

Consider adding a pop of color by painting the cabinets a rich and inviting tone like blue or green to break up the neutral colors in a space.

C

## KITCHEN

**It's more than just a spot to eat.**

You chop. You sauté. You clean. You cook. It's where you catch up on the day. Welcome to the kitchen. It's every home's hero. That multi-talented space where so much happens, it's an understatement to call it multitasking. And lighting can make the kitchen so much lovelier on every level.

## Unexpected Pendant Placements

Pendants aren't just for kitchens; these beautiful fixtures can be the shining focal point of any room, especially when placed in unexpected ways. Take, for example, a reading chair, which may traditionally feature a downlight or table lamp. Imagine the stylish possibilities if you added a hanging pendant instead. Or replaced your bedside lamps with twin pendants for a centering appeal. Even an enclosed patio can become a bright spot of style with a well-placed pendant. One of our favorite unexpected pendant placements is the bathroom. Consider an asymmetric placement of one pendant in a powder room, or mini pendants used in place of sconces, which can properly illuminate the face for that all-important getting-ready glow.

## KITCHEN CORE ELEMENTS

The kitchen is the place for it all. Functional lighting – and welcoming environments – are key. When decorating or designing the kitchen, consider how busy the space is. The kitchen is where multitasking takes place so plan with that in mind. Find sturdy, but stylish materials, including hardware and floors that will shine despite the constant traffic (and spills!).

Visit [Kichler.com/Kitchen-Ideas](https://www.kichler.com/Kitchen-Ideas) for more inspiration.

**Birkleigh™**  
52073BK | Pendant  
Black

## The Case for Clusters

Lighting can cast an even more dramatic statement when mixed or matched. For an ultra-modern look, cluster three different shapes or sizes of the same pendant family together over a kitchen island. Or, alternatively, the same pendant but in three different sizes or finishes could add a subtle statement of style over a dining table. Get creative. If you want your home to be less matchy-matchy, mixed and matched clusters are a great way to think outside the bulb.

G

## Make a Statement with Island Pendants

The number of pendants depends on the size of your island and the size of your pendants. Generally, pendants look best in odd numbers, and this is especially true of mini pendants. However, if you're using larger pendants over a larger island, 2 could work and 4 pendants will look best if they are complementing the corners of a large square island. As a rule of thumb, pendants should be hung with the bottom 36" from the countertop, but varying the hanging height of multiple mini pendants can be visually appealing as well. Multiple mini pendants over an island should have somewhere between 12" and 24" between the widest points and that distance grows with the pendant diameter. Remember to place pendants at least 6" or more from each end of the island to avoid an overcrowded look.

## A New Look with Lighting

**@athomewithashley**

"When I helped my sister redo her kitchen, we focused on creating a cozy dining area. The Hayman Bay chandelier made the space – hanging it was the cherry on top! The wallpaper was a splurge, but we balanced that out with saving in other areas. For example, the table was passed down from a family member and I sanded it down to give it a new look. The banquette seating is a store-bought \$50 bookcase that we put on its side and created a budget-friendly bench with lots of storage. It's all about mixing the high end and affordable pieces!"

A.  
**Kadas™**  
52214PN | Wall Sconce

B.  
**Downtown Deco**  
44128MCH | Chandelier  
Midnight Chrome

C.  
**Baland™**  
52418BNBLED | LED Chandelier  
Brushed Natural Brass

**DESIGN TIP**

Hang your statement chandelier 30-36 inches above your table for optimal light.

C

## DINING ROOM

**Large or small, it inspires and brings us together.**

It's the place you get together. Whether it's Monday night dinner, a holiday gathering or a homework haven, your dining room can be a true reflection of personal taste – beyond the food on the table. Your dining room has some serious possibilities and the right lighting can make it everything you want it to be.

## Think Beyond Traditional

So here's a myth buster: you actually don't need a giant dining room, a tall ceiling and a huge table for a chandelier to make a statement. Have a long table? Try a linear chandelier. Want to make your silver sparkle? Go with LED lighting. Dining room lighting can make a lasting statement long after the guests leave.

## DINING ROOM CORE ELEMENTS

Your dining room table light is often the centerpiece of the room – and it's also your chance to make a big statement. Every dining room has that potential, no matter its size. To make your dining room stand out, consider adding sconces, a richer paint color, a neutral tone table cloth, and a mirror or painting.

Visit [Kichler.com/Dining-Room-Ideas](https://www.kichler.com/Dining-Room-Ideas) for more inspiration.

**DESIGN TIP**

Choose a neutral color palette, a cozy rug, and a pop of color for an updated traditional or soft contemporary feel.

## Change the Bulbs, Change the Look

One simple way to switch up the style of a light fixture is to switch out the light bulbs. Round, globe bulbs are more modern and give a mid-century vibe. Candelabra lamps offer a more traditional design and are a great way to enhance the updated traditional style of a space.

A.

D

## Add Layers to Create a New Look

The full effect of layered lighting is clearly seen in this retro dining space. By mixing a statement chandelier with stylish sconces, it's now a place that welcomes all who enter with open arms and makes them want to stay—which is the true secret to lighting your home right.

“

Inspiration for Tolani™ came from a major European Design Show and the trend where traditional shapes were being broken apart. The Tolani family exudes the simple elegance of the art deco period.”

**Amanda Gardner, Senior Product Designer**

C

D

## A Blend of Styles Sets the Table for a Stunning Space

If you really want your style to stand out, it's important to mix things up. One general rule is to match ornate pieces with more plain and simple ones, so your style doesn't look like it has competing elements. Try pairing one statement piece and the other accents complementing it. For example, if you have a gold chandelier, mixing in a few pieces of brass or black hardware will give the room a complementary look.

## Gold is Made to Last

**@jessicasaramorris**

"I like to renovate spaces first that I know will be used frequently: Living Room, Dining Room, Kitchen and do the bedrooms last. But changing out lighting, paint and hardware can go a long way in making a space feel completely different! I tend to stick to an antique brass for lighting, not only because it's my favorite, but it fits with my minimalist boho style."

**A.  
Calters™**  
52293CGLED  
LED Linear Chandelier  
Champagne Gold

## Go for the Gold

Nothing shines quite like gold. And gold accents can spruce up a space and take it from fine to fabulous. Gold is a staple of almost every décor style, so no matter what your home looks like, you can add a pop of shine. For Art Deco styles, add a touch of brushed natural brass. Or for a more Industrial look, pair gold with black or polished nickel. And if you want to go for a mid-century feel, go with champagne gold or natural brass, and pair it with black or white accents.

**DESIGN TIP**

For larger bathrooms with multiple sinks, include a light over each mirror. Consider adding extra light layers with tape lighting or ceiling downlights.

A

B

## BATHROOM

**Unites the bustle of the day with the leisure of the night.**

The bathroom is the main space where you groom and get ready—which is why proper lighting is so important. Starting your morning off on a bright note (and avoiding shower puddle slips) can set the stage for the rest of your day. While winding down the day with the soft glow of cabinet or toe-kick lighting to help navigate during the evening hours.

## BATHROOM CORE ELEMENTS

Bathrooms can be both functional and beautiful. To add some pizzazz, consider adding a pop of color with a fun wall paint or colorful towels. Add in a black finish mirror and coordinating sconces or pendants for more focused light. To carry the look throughout the room, consider adding a black or dark-colored rug to coordinate with your fixtures and mirror.

Visit [Kichler.com/BathLighting](https://www.kichler.com/BathLighting) for more inspiration.

### Rainbow Bathroom

**@athomewithashley**

Ashley Wilson, the designer behind @athomewithashley, recently renovated her bathroom in her home in Utah. Deemed the "rainbow tile bathroom", Ashley designed a colorful, happy escape complete with new plumbing and a stunning wall. A reclaimed vintage vanity lit by our Indeco™ LED modern vanity light completes this space. Ashley's bathroom is mix and match perfection, balancing vintage with modern and colorful with neutral.

“

Inspired by candlesticks in a tall hurricane glass, Giarosa's™ double glass layers distinguish it from other lighting fixtures. When paired with different visual home décor elements, its simple contemporary design blends beautifully with soft contemporary, modern contemporary or an art deco design style."

## How Many Vanity Lights Are Right?

Most collections come with options of between one and four lights. Both the size of the mirror and the size of the room must be considered when determining which light is best for your space. If your bathroom is smaller, you might want to consider a one- or two-light vanity; for slightly larger bathrooms, a three-light vanity will work nicely. Add sconces on each side of the mirror for more focused light around your face.

## Complement Your Style with Black Finishes

If you're into art deco or vintage, black finishes can make the look. They can be avant-garde or 1930s-inspired. They're naturally modern in a classic kind of way, bringing a timeless feel to your contemporary décor. Black finishes in your lighting can add unpolished authenticity to your modern farmhouse style. Get creative. Even small accents like dishes, plant stands, and frames with black finishes can bring eye-catching sophistication.

## OUTDOOR LIVING

### Retreat. Relax. Reconnect.

Kitchen oasis. Entertainment zone. Welcoming entrance. No matter the size, your outdoor living spaces are a reflection of you. It's an escape from a long day. A spot where friends and family come together. An area where you can disconnect and enjoy the great outdoors, day or night.

A

## Climates™

Harsh sunrays, intense cold, constant salt spray...whatever your climate, we offer lighting that stands up to the elements. Our Climates™ Outdoor Lighting uses a composite material with UV protectant to create an anti-fading finish resistant to acidic and alkali elements, corrosion and rust. The high-tech material also allows for detailed designs, capturing distinctive styles that reflect a home's character.

## Outdoor Lighting Placement

Your outdoor space should feel like an extension of your home. With a little planning, you can make it feel like a great escape. But first, you need the right light. A good outdoor lighting plan includes layers to create eye-catching effects. Welcome guests to your home before they even set foot in the door with a large, outdoor wall-mounted fixture. Add a ceiling light and pendant to put a polish on a front porch. Add a smaller outdoor mount to the back door, and some pendants or even a ceiling fan if your space allows. Post lights can also shine on a path or by a patio. Good lighting makes every step outside even better.

## Outdoor Lighting and Connecting with Friends

@thegoldhive

"Lately, we're spending more time outdoors and finding creative ways to get a change of scenery and safely see friends. One way I've been doing this is by maximizing backyard space to extend outdoor hangout time into the evenings, especially as the seasons shift and it gets dark earlier. How, you ask? Landscape lighting and outdoor seating! And I mean nice outdoor lighting that illuminates our outdoor meals, floods seating areas with light to see friends, and casts light on surrounding greenery like these LED Two Arm path lights."

B

### DESIGN TIP

When mixing styles, make sure you only mix two. Coastal and Contemporary make a great style match.

## Mix and Match Your Finishes

Mixing finishes is a simple way to keep your patio, deck, or outdoor space from looking too uniform. When mixing finishes or metals, keep to two or three metals max; any more than that will get distracting. Opt for opposing colors, like black and brass - or - similar cool or warm shades, like chrome and nickel. Also, consider the finishes of your outdoor furniture, door hardware, or outdoor kitchen knobs as part of your mix and match plan.

**DESIGN TIP**

For a galley kitchen, consider space-saving light such as tape and channel lighting, mini pendants or a fandelier.

## UNIQUE APPLICATIONS

### Transforming nontraditional into so much more!

While we all know there are spots in our home that are important to decorate, there are some areas where we forget to add those special touches - like in a reading nook, office, entryway, or mudroom. By adding a hint of style, color, and the right light, you can breathe new life into these unique areas of the home.

Also available in  
Satin Black

## Where Chandelier Meets Ceiling Fan.

Our new fandelier designs make a statement with modern industrial design and two tone finishes. The unique design delivers the best of both worlds. Presenting a beautiful design on the outside with a ceiling fan on the inside. Fandeliers are ideal for smaller size installations or multiple installations in a larger area.

## Glam Home Office

@mojisstyle

Moji always knows how to glam-up a space, and her recent home office flip is no exception. While the color palette is neutral in her new office, the design is anything but that. The high-shine gold finishes, black accents, and modern furniture add a touch of glamour to the space. The Arabella chandelier in gold finishes off this space that is sure to make your WFH sweatsuit feel like formal business attire.

## HOME OFFICE ELEMENTS

Working from home is most enjoyable if you have a functional and efficient space to check things off the list. Create a unique office space that helps you balance both creativity and productivity, all in the comfort of your own home.

Visit [Kichler.com/Office](https://www.kichler.com/Office) for more inspiration.

### Shared Office

The home office has transformed into so much more lately. To create a spot where everyone can work together, consider creating workstations. Add shelving, a corkboard, containers for supplies, cabinet lighting, downlights, and a ceiling fan or pendant for additional layers of light.

## Creating Lasting Impressions

The entryway is the first place that we greet guests and say farewell. This small but mighty space offers so many possibilities. You can dress it up with a favorite piece of artwork and add a splash of color. Or add depth with a decorative mirror and scones on each side. If the entryway tends to be one of the busiest spots in your home, consider adding a coat shelf for bags, packages, and coats. For additional lighting, install a flush mount or pendant. No matter how you dress it, the entryway is always a spot that is refreshing and welcoming.

## Quick Entryway Updates

@jessicasaramorris

"For our entryway, we put DIY board and batten halfway up the wall with hooks that spanned the entire wall. This inexpensive project cost under 100 dollars. Then above the board and batten we installed a statement mirror and an Ellerbeck sconce from Kichler Lighting. On the other side of the room, we built a DIY bench for seating when we first come in the door. Our entire entrance is extremely functional but also beautiful. We mixed black and gold metals in our entrance. I recommend always adding a mirror in your entrance to bounce light, make it feel brighter and more welcoming. I also love hooks to make a space really feel lived in."

## Don't Forget About the Nooks and Crannies

The most often overlooked spaces in the home are nooks and tucked away spaces. And there's no better way to brighten them up than with a distinctive pendant light or a charming chandelier. Incorporate plants and shelving for style and tranquility. An intriguing piece of art or a colorful vase to ensure a stunning statement in every corner.

UNIQUE APPLICATIONS

## Lighting in Focus

Pin-up sconces are timeless pieces that work perfectly in a variety of areas around the home such as reading nooks, beside a bed, or near a favorite armchair.

Adding pin-up sconces on each side of your bed allows for more focused light during the evening hours. Plus, the option to install or unplug the fixture allows you to easily move it to other areas of the room or home.

*featured: Kadas Collection*

- Bulbs not included unless otherwise noted.
- Wattages stated are the maximum recommended; however, you may use lower wattage lamps to suit your lighting needs. Some recommended lamps are not available in the maximum allowable wattage.
- All electrical products are rated as 120-volt, AC unless otherwise noted.
- All electrical products are certified and listed to UL/CSA/ETL Standards for use in U.S.A. and Canada except where noted.
- All chain drop products equipped with at least 72" of chain unless otherwise noted.
- All products featured in the outdoor section are certified and listed to UL/CSA/ETL standards for wet location except where noted.
- Many long-life tungsten halogen capsule lamps are now available as alternates to conventional incandescent light bulbs. The halogen capsule lamps may be used to replace any lamp of a higher wattage, but not to exceed the existing specified maximum wattage, i.e., 72W may replace a 75W.
- On some products, in order to accommodate higher-than-normal ceiling height, extra lead wire is supplied and specified. With additional sections of chain or stems (not included), this allows an added measure of design flexibility.
- Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, airborne pollutants, and other forms of weathering.
- To serve you better, Kichler Lighting reserves the right to make improvements to the products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.

## Consumer Notice

### Federal Legislation to phase out 100 watt Incandescent Bulbs started January 2012

The federal government enacted the Energy Independence and Security Act of 2007 in December 2007, requiring all general-purpose light bulbs that produce 310-2600 lumens of light be 30% more energy efficient (similar to current halogen lamps) than current incandescent bulbs by 2014. The efficiency standards started with 100 watt bulbs in January 2012 and will end with 40 watt bulbs in January 2014.

Light bulbs outside of this range are exempt from the restrictions (historically, less than 40 watts or more than 150 watts). Also exempt are several classes of specialty lights, including appliance lamps, rough service bulbs, 3-way, colored lamps and plant lights.

In 2020, a second tier of restrictions will become effective; which requires all general-purpose bulbs to produce at least 45 lumens per watt (similar to current CFLs). Exempt from the Act are reflector flood, 3-way, candelabra, colored and other specialty bulbs.

Many governments worldwide have passed measures to prohibit the sale of incandescent light bulbs for general lighting. The aim is to encourage use of more energy-efficient lighting alternatives, such as compact fluorescent lamps (CFLs) and LED lamps.

We go to great lengths to assure the metal and glass finishes shown in the catalog match the actual products, but printing variations and variations in chemical finishes and the nature of hand-applied finishing will cause some differences between the printed images and actual product, and from one product to another.

We use only non-ferrous materials on the exterior parts of our outdoor lantern products, and use the best available weather-resistant finishes. However, due to some extreme environmental conditions such as acid rain, salt air and ultraviolet exposure, we cannot guarantee our exterior finishes, with the exception of our LifeBrite™ lanterns.

Due to environmental conditions such as soil acidity, concrete alkalinity and other corrosive soil and air conditions, we cannot guarantee our direct burial posts.

All electrical products are UL/CSA/ or ETL Listed and Certified to UL/CSA Standards for use in U.S.A. and Canada except where noted.

Kichler is a member of the American Lighting Association (ALA), a trade association representing the residential lighting and ceiling fan industries in the United States and Canada. Its membership includes leading lighting and fan manufacturers, showrooms (retailers), manufacturers representatives and designers. ALA members are dedicated to providing the public with the proper application of quality residential lighting.

To serve you better, Kichler Lighting reserves the right to make improvements to products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.
